

## GAMMA PHI BETA ANNOUNCES NEW INTERNATIONAL HEADQUARTERS

January 26, 2023

Centennial, Colorado — For 30 years, **12737 E. Euclid Drive in Centennial, Colorado**, has served as home to Gamma Phi Beta's International Headquarters (IH) staff and created a strong footing for our success. Like most businesses, Gamma Phi Beta's needs and ways of functioning have changed over the years. Technology has continued to make our sisterhood more efficient; it has allowed our staff to perform their roles effectively from a remote workspace, something our volunteer workforce has successfully done for so many years. After 10 years of considering the building's sale, International Council (IC) determined the time had come to reduce our physical footprint and sell the building. In September 2022, an interested buyer made an offer to purchase the building.

Beginning in January 2023, IH will transition to a leased property at **9155 E. Nichols Ave. Suite 330, Centennial, CO, 80112**. This smaller space provides modest storage and workspace for several staff members. We are thrilled that the space will allow us greater flexibility to meet the needs of the business side of our sisterhood. Over the next several months, we will be branding the new space and making it the beautiful home Gamma Phi Beta deserves.

In 1992, our goal for building and owning our own headquarters in Colorado was to position us for the future. It allowed our sisterhood to grow and evolve by giving us a flexible space to adapt to the needs of the Sorority. It hosted many priceless artifacts, and even served as a sleeping quarter for collegiate leadership consultants (CLCs) and volunteer leaders. Our staff and volunteers have precious memories of time spent within the walls of Euclid Drive, and we are grateful for the memories made in this building. International President Autumn Hansen shared, "Gamma Phi Beta is much more than a building, an office or an address. It is a sisterhood of dynamic women rooted in True and Constant friendship who appreciate lifelong learning and continual growth."
